
Dear CNC Value Partner,

CNC was founded on the idea of making kitchen cabinets more accessible to all, by offering the ultimate value design, quality and price.

For over three decades now, we at CNC have been providing kitchen and bath dealers and the customers they serve throughout the United States with the ultimate value in kitchen cabinets, countertops, and bathroom vanities. Rather than tossing about meaningless boardroom phrases, we set out to define just what exactly value means.

For us, value means ordering high-quality products at affordable prices. Value means being able to offer a vast, ever-expanding selection of progressively designed door styles. Value means providing lightning-quick turnaround times. Value means giving someone the ability to talk to a real person who understands your needs.

Our motto, "America's Best Value in Cabinetry", reflects our commitment to you, our customer. We provide this value nationally through our many locations across the country. This strategy not only ensures efficiency in delivery but also emphasizes our nationwide accessibility.

This is the core of CNC - a company built on providing our customers with the ultimate value in design, quality, and service. Our cabinets create a comfortable and personalized living space, transforming the house into a home. Please peruse the accompanying material to get to know us, and how we can service you.

Thank you for choosing CNC Cabinetry.

Cabinet Care Information

Finish Awareness Statement

Thank you for choosing a stained finish product from CNC Cabinetry. When purchasing cabinetry, we would like to ensure our customers are properly educated on the characteristics of the wood used and the finished wood they are purchasing. Please review the following "Finish Awareness Statement".

All of CNC's finishes are applied in the same manner and with the same quality standards. There are some unique characteristics with stained finishes across all wood species, and it is important to understand that these characteristics are not considered quality defects.

- 1. Wood in its natural state expands and contracts. Because of this natural movement, you may find evidence of slight cracks in joint lines on doors and face frames. Center panels will shrink exposing minor unfinished areas of wood. These slight cracks are normal and not considered quality defects. Proper humidification should be maintained during storage and after installation.**
- 2. Every tree grows differently giving each piece of wood its own unique characteristics. By the very nature of wood, grain patterns and other wood characteristics including mineral streaks, knots, and other variations are considered normal. Because of this, stain will appear differently across the same cabinet. This is the natural beauty of the wood.**
- 3. End grains on door edges and panel profiles may exhibit open grain or voids in wood appearing as "Rough Spots" in the wood. Stains often highlight indentions into the wood. These imperfections are normal and are not considered quality defects.**
- 4. Light-colored wood may heighten light-and-dark effects, and cause blotchiness when medium or dark stains are applied. These are natural occurrences and are within CNC's strict standards of wood-finishing.**

These imperfections are normal and will not be considered as reasons for replacement.

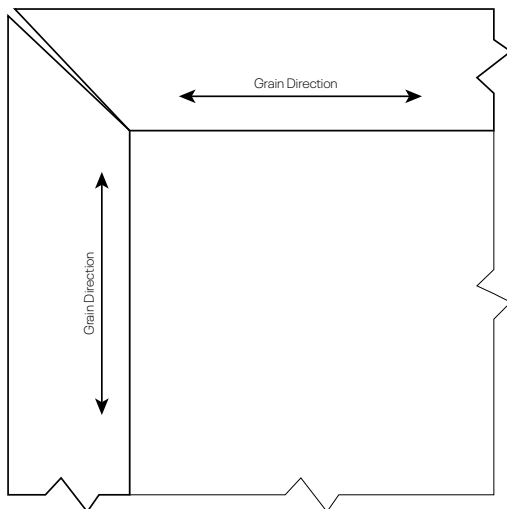

We, the manufacturer, nor your authorized dealer will replace products or issue credit based on any of the above reasons.
